Old Faithful Geyser --- Old Faithful is a cone geyser in the Upper Geyser Basin of Yellowstone National Park. It is one of the park's most well-known natural features, and is famous for its predictability. It generally erupts every 92 minutes.

Grand Prismatic Hot Spring --- The third largest hot spring in the world, the Grand Prismatic Hot Spring gets its color from bacteria around its rim that feed off of the mineral-rich water. In the summer months, the hot spring is a vivid red-orange shade.

We appreciate the elegance of Yellowstone, such as Yellowstone Lake, Fishing Bridge, mud volcano, Upper Falls, Artist Point, Mammoth Hot Springs, Yellowstone River, Norris Geyser Basin... spot elk herds, buffaloes, or a bald eagle for yourself! Artist Point --- Named after the famous sketches of the waterfalls by Thomas Moran (but not actually the location where the sketches were done) this beautiful location showcases one of the most famous views in Yellowstone National Park.

Norris Geyser Basin --- the hottest and oldest thermal area of Yellowstone, we will sightsee multiple hot springs, geysers and mud pots.

Little Biscuit --- Duration: Approx. 30 minutes.

Grand Canyon of the Yellowstone --- This impressive gap in the earth is the first large canyon on the Yellowstone River. It is 24 miles long, and can reach a quarter-mile in depth and 3/4 a mile in width. It is gorgeously colored.

Upper Yellowstone Falls --- Located a quarter-mile upstream of the larger Lower Falls, the Upper Yellowstone River Falls plunge 109 feet down an eroded lava cliff into the basin below. The area below the falls has been subject to heavier erosion than above.

Mud Volcano Area --- The Mud Volcano blew itself apart in the early 20th century, but visitors can still see the impressive crater and other geothermal features in the surrounding area, such as the Mud Cauldron, Black Dragon's Caldron, and Dragon's Mouth Spring.
